

## Features & Benefits

- Manual adjustment of temperature
- 2-digits display
- Automatic temperature control algorithm with external temperature reading
- Manual valve openness control
- Open window detection
- Child lock

## Technical Overview

Vicki is a smart thermostatic radiator valve (TRV). Can be retrofitted to radiators with a thermostatic valve, enabling temperature control and monitoring from a distance. Manual target temperature selection by rotating the outer ring of the device. The target temperature is displayed on the device.

## Technical Specification

|                           |  |
|---------------------------|--|
| <b>Radio output type</b>  | LoRaWAN 1.0.3  |
| <b>Frequency Range</b>    | EU863–870; Other LoRaWAN regional settings available upon request                                |
| <b>Security</b>           | End-to-End encryption (AES-CTR)  |
| <b>Batteries</b>          | 2 x AA (Included)  |
| <b>Battery Life</b>       | > 10 Years   |
| <b>Compatibility</b>      | M30x1.5mm  |
| <b>Adaptors available</b> | M28x1.5, Giacomini, Caleffi, Danfoss (RAVL, RAV, RA metal & plastic, ORAS,( stabila & Termostar) |
| <b>Housing colour</b>     | White  |
| <b>Housing Dimensions</b> | 54mmØ x 78mm   |
| <b>Country of origin</b>  | Bulgaria   |
